

# Chase the Night Away

Keane

You can shape the dying day  
Into something better  
We can hold the ghosts at bay  
Build something together  
You can see the beauty in  
A dirty rain-lashed street  
Or a plan that goes nowhere  
You can make this town feel kind  
Though the buildings cry  
But you don't belong, don't belong

You can chase the night away  
Guess I'm trying to say  
You heal me like the light of day  
You can keep me searching on  
You say it won't be long  
'Til all the pain you felt is gone  
It won't be long

Sorry I'm distracted by  
Things that you can't help with  
Aloneness you can't recognise  
Or know unless you've felt it  
Show me how to love again  
Let the branches bend  
Life's rolling on, rolling on

You can chase the night away  
Guess I'm trying to say  
You heal me like the light of day  
You can keep me searching on  
You say it won't be long  
'Til all the pain you felt is gone  
It won't be long

'Til your mind stops reeling  
It won't be long  
'Til regret surrenders  
It's old and the scars start healing  
Falling off a cliff and still wondering  
Where the ground has gone  
Something in your faith  
It keeps me searching on, searching on

You can chase the night away  
Guess I'm trying to say  
You heal me like the light of day  
You can keep me searching on  
You say it won't be long  
'Til all the pain we felt is gone  
It won't be long

Guess I'm trying to say  
You heal me like the light of day  
You can keep me searching on  
You say it won't be long  
'Til all the pain you felt is gone

It won't be long
