Sunshine

I hold you in my hands A little animal And only some dumb idiot Would let you go But if I'm one thing Then that's the one thing I should know Can anybody find their home Out of everyone Can anybody find their home

I hold you in cupped hands And shield you from a storm Where only some dumb idiot Would let you go

But if I'm one thing Then that's the one thing I should know Can anybody find their home Out of everyone Can anybody find their home Lost in the sun Can anybody find their home Come on, come on Can anybody find their home

Oh oh-oh-oh Can anybody find their home Out of everyone Can anybody find their home Lost in the sun Can anybody find their home Come on, come on, come on Can anybody find their home

Oooooh Can anybody find their home
