## **Time to Go**

Now, picturing a scene Seen it all before We drink, we drink a little much We drink a little more To shake off the nerves and Take off the edge and Now, is there any way back home?

Seen it all before And I know the signs We drink, drink a little much To stimulate the mind Now it's two hours to go Insult everyone that we know Now it's such a long way home

Maybe it's time to go Maybe it's time we went You're making a spectacle Maybe it's time we left

I don't wanna spoil your night I don't wanna hurt your pride But maybe it's time to go Maybe it's time

Now, eating from your hand Laugh at every line Soon, losing track of you Losing track of time Now it's dead on the dance floor And nobody's laughing anymore Have I become a tiresome bore?

Maybe it's time to go Maybe it's time we went You're making a spectacle Maybe it's time we left

I don't wanna spoil your night I don't wanna hurt your pride But maybe it's time to go Maybe it's time... to go

Where there's nowhere to hide From what's broken inside A faultline rips right open Under the wide wide ocean's tide Under the wide wide ocean

Maybe it's time to go Maybe it's time we went You're making a spectacle Maybe it's time we left

I don't wanna spoil your night I don't wanna hurt your pride Maybe it's time to fly Maybe it's time Maybe it's time to go Maybe it's time..
