## **Just Outside My Window**

## **Keaton Simons**

When she told me you had died I took a breath Blinked my eyes And didn't show it It wasn't till I heard the song that squeezed my heart and brought the storm just outside my window Now I feel it can't be real Please take me home Your empty body doesn't remind me CHORUS In the beginning there was nothing Some things never change Just outside my window is the rain We had plans and we had time I really thought we'd live our lives here together But like a Monarch Butterfly a glimpse of beauty passing by Just outside my window Now I feel it can't be real Please take me home Your empty body doesn't remind me In the beginning there was nothing Some things never change Just outside my window is the rain Is the rain Just outside my window Just outside my window In the beginning there was nothing Some things never change Just outside my window is the rain Is the rain Oh In the beginning there was nothing Some things never change Just outside my window is the rain Is the rain Just outside my window Take a look Take a look outside

my window

Take a look outside my window Just outside Just outside
