

The Grand Design

Keep of Kalessin

The sense of life
Expected to be nothing else
Oppotunity for self release
Is clinging to mortal disease

Nothing can pass
Once crossing it's path
Kingdom come on a cosmic scale
A force so strong
Not even light escapes

Our world is a principle of contagion
The universal notion of cause and effect
All is entangled in vast systematic unity
Even the most horrific congenital defect

Leaving - Chasing end from afar
Dying - The death of a star
Evolving - Into mass from time beyond time

Leaving - The fear of mortality
Dying - The fate of reality
Ending - Intertwined into a grand design

From pitch black emptiness
Boundaries destined to seize
Unleashed - Nowhere to be appeased

Macro time - Micro space
Cosmic revelation for a mortal race
From the shadows beginning - A natural end

Leaving - Chasing end from afar
Dying - The death of a star
Evolving - Into mass from time beyond time

Leaving - The fear of mortality
Dying - The fate of reality
Ending - Intertwined into a grand design

The sense of death
Expected to be nothing else
Intertwined heart - The fear of mortality

This war of life
Intertwined into a grand design
Open your eyes to the fate of reality

Seed sprung into existence
Binary basis profound
Eluded comprehension
Paramount wisdom decay

Horizons of tomorrow
Nightsky reflecting the past
A cosmic revelation
Velling the ultimate truth
