

# If Ever I Could Love

Keith Urban

I used to cry in the middle of the night  
Baby hold me tight  
There was nobody beside me when I opened my eyes  
Now I've turned the color of those days and nights  
Now somethings inside me changed and I think I might be startin  
g over  
I don't wanna run  
Oh no, cause you might be the one, baby

If ever I could love, I think it could be with you  
If ever I thought Id find somebody so true  
I wonder if you feel the same way that I do  
If ever I could love I think it could be with you

You know I cant read your mind my love but it seems to me  
Your heart and mine tonight are defying gravity  
Somethin' so familiar its still so unknown  
The closer that I get I swear it feels like coming home  
I ready to be brave  
Oh yeah, When you look at me and say

If ever I could love, I think it could be with you  
If ever I thought Id find somebody so true  
I wonder if you feel the same way that I do  
If ever I could love I think it could be with you

If ever I could love, baby  
If ever I could love  
If ever I could love

If ever I could love, I think it could be with you  
If ever I thought Id find somebody so true  
I wonder if you feel the same way that I do  
If ever I could love I think it could be with you

I still never forget when the baby came and she walked out of m  
y life  
And got hurt so bad  
I swore Id never let another get inside this heart of mine  
But she touched my hand and everything plan I had disappeared l  
ike a falling star  
Now theres a new beginning and Im moving to the rhythm of a new  
and braver heart  
A braver heart  
If ever I could love, oh oh  
If ever I could love, yea yea
