

Blackout

Keke Palmer

Are you shy? You still didn't see me walking by?
I speak up, try my best to break the ice
You're still disturbed like it's your very first time

Cause I think you're cute
If you didn't guessed, I stick like glue
Let me help you, help you with the clue
I can see you being by my side
Side, get it right, somebody turn on the light

You're blacking out, blackout
I can make it easy, boy you spell it out
Spell it, you and me, together we can shut it down
Shut it, I'll make you remember what I'm all about
Blacking out-out, blacking out-out

Once again, you tell your friends it's me you wanna be with
But they just can't help you out with this
It's like somebody walked up and turned off your switch

I see sparks fly (and I think of you)
Together I can see I need the lights (do you see it, too)
Let me help you, help you with the clue (I'm really feeling you)
I can see you being by my side
(Side, get it right, somebody turn on the light)

You're blacking out, blackout
I can make it easy, boy you spell it out
Spell it, you and me, together we can shut it down
Shut it, I'll make you remember what I'm all about
Blacking out-out, blacking out-out

You're blacking out, blackout
I can make it easy, boy you spell it out
Spell it, you and me, together we can shut it down
Shut it, I'll make you remember what I'm all about
Blacking out-out, blacking out-out

I reach out my hand
I hope you take this chance
Cause I want more than just a friend

Come closer if you dare
Stay only if you care
It's just you and me
Let's see where this will lead

You're blacking out, blackout
I can make it easy, boy you spell it out
Spell it, you and me, together we can shut it down
Shut it, I'll make you remember what I'm all about
Blacking out-out, blacking out-out

You're blacking out, blackout
I can make it easy, boy you spell it out
Spell it, you and me, together we can shut it down
Shut it, I'll make you remember what I'm all about

Blacking out-out, blacking out-out
