

Number One

Keke Palmer

Sitting on the phone, calling you
It occurred to me
That probably tonight could be
Searching for a lifetime and never be happy
Again not totally
Satisfied love will never be the same
Don't like to lose control
Until you change the game yeah
You stole my heart right from the start
How could I let you know?

You're number one
Don't know if I should tell you
Nobody got nothing on you
You're number one
I know I'm blowing up your head
But nobody going next to you
No oh oh
Don't even know where I'm going
As long as I know I'm coming with you
You're number one
I want more than I can get to you
To me there's nobody but you
Oh, ooh oh

You're number one
You're number one
You're number one, yeah

There's no way to describe just what you do to me
Surprise that I can breathe
How you take my breath away
Baby, I believe there's no coming back for me
Satisfied love will never be the same
Don't like to lose control
Until you change the game yeah
You stole my heart right from the start
How could I let you know?

You're number one
Don't know if I should tell you
Nobody got nothing on you
You're number one
I know I'm blowing up your head
But nobody going next to you
No oh oh
Don't even know where I'm going
As long as I know I'm coming with you
You're number one
I want more than I can get to you
To me there's nobody but you

I know as long as I've been waiting for love
No I ain't ever tryina let you go
Yeah, I'll keep living every minute
I'll keep fighting till the finish
Yeah, I'm in it, and I know

That I could never ever get enough
How you make me forget what came before you
Your love is number one

You're number one
Don't know if I should tell you
Nobody got nothing on you
You're number one
I know I'm blowing up your head
But nobody going next to you
No oh oh
Don't even know where I'm going
As long as I know I'm coming with you
You're number one
I want more than I can get to you
To me there's nobody but you

You're number one
You're number one
You're number one, yeah
