

We Can Make Up

Keke Palmer

Baby know I'm complicated, calculus, algebraic
That don't mean you can't understand lesser than, greater than, peeping on t
he other hand
I don't wanna oh complicated
Minus one, I can't take it
That don't mean I don't understand that divide, multiply
By the thousand times we tried

And they're saying we're too young to decide
This ain't right, is that right
They're saying we're too dumb to get this right
The first time, of being right

Oh we can make up
Baby got all my numbers, and that of I still want you
Wanted no one, that's the one
We can make up
Baby got all my numbers, and that of I still want you
Wanted to, that's the one
We can make up

This ain't P
Don't be playing
I know it's hard, but what cha saying
Babe if you need a tutor than, I'm your friend, let me in, I know what the a
nswer is
They don't know, it's complicated
Me and you, you know they hate it
They don't know that we studied hard
Got so wrong, were're almost starting over but were're holding on (Ohhhhhh)

And they're saying we're too young to decide
This ain't right, is that right
They're saying we're too dumb to get this right
The first time, of being right

Oh we can make up
Baby got all my numbers, and that of I still want you
Wanted no one, that's the one
We can make up
Baby got all my numbers, and that of I still want you
Wanted to, that's the one
We can make up

We can make up right now
I love you babe write that down
Think were're ready right now
Maybe we can get and move on

Oh we can make up
Baby got all my numbers, and that of I still want you
Wanted no one, that's the one
We can make up
Baby got all my numbers, and that of I still want you
Wanted to, that's the one
We can make up

Baby got all my numbers
And that of I still want ya (We can make up)
Want on one, that's the one (We, we can make up)
We make up
Baby got all my numbers (Ahhhhhhhhh)
And that of I still want ya (Ahhhhh)
Wanted to, that's the one (Ahhhhhh)
We can make up
