

# Don't Let Me Stop You

Kelly Clarkson

1. I used to be a little bit shy  
I kept my deepest feelings inside  
Speaking up to you about my emotions has always been hard  
But this just can't wait  
Tonight I feel a little bit brave  
So I won't let one more day pass without me explaining what we are

X1: This is gonna sound kinda silly  
But I couldn't help but notice  
The last time you kissed me  
You kept both eyes open  
Baby, can you tell me what does that mean?  
If you're looking all over your shoulder  
Then you don't need to be with me  
And I don't need to hold on

R: Don't let me let me stop you  
From doing what you wanna do  
You don't wanna stay with just me it's cool  
Take no chance getting over you  
No no don't let me let me stop you  
If you wanna leave baby you can leave  
Just don't pretend that you're into me  
If it ain't true no, don't let me stop you

2. A lot of things I can take  
Gotta a high threshold for pain  
But let's get one thing straight - I'm not down to share you with anyone  
If that's not what you're looking for  
Nice knowing you, but there's the door  
Cause I know that I can find someone to give me what I want

X2: This is gonna sound kinda silly  
If you're looking over your shoulder  
Then you don't need to be with me  
And I don't need to hold on

R: Don't let me...

\*: Even if I end up broken hearted  
I won't lie  
I don't wanna hear goodbye

But either way I'll be alright

R: Don't let me... (2x)
