## Take Me To A Dream

Love of my you are Sunlight, my shining star All of the world to me All I could ever need Lately I can feel you've grown away from me And inside I pray it's not too late to find a remedy

Don't wanna live a lie I don't wanna say goodbye So how can I start again And how will my heart mend Here I am alone with only memories So I'm searching just to find a way to keep you here with me

So I close my eyes And I go back in time When our love was strong Before our hearts went wrong I keep holding on to how it used to be So lay me down and take me to a dream

Dreams that you're holding me Dreams that won't ever be Visions of loving you Wanting to make them true I find myself believing you'll come back to me Cause I'm trying not to feel the pain, that loneliness can bring

So I close my eyes And I go back in time When our love was strong Before our hearts went wrong I keep holding on to how it used to be So lay me down and take me to a dream

It's so hard to make it through the day without you So I pray for night to dream you're here with me, with me

So I close my eyes And I go back in time When our love was strong Before our hearts went wrong I keep holding on to how it used to be So lay me down and take me to a dream So lay me down and take me to a dream **Kelly Price**
