

# Forever and a Day

Kelly Rowland

I can feel when you're happy  
When you're near me, every heart beats  
Making me feel, like it's magic and we have it, when it happens

I wanna scream your name, out to the sky, let it shine with the stars  
Now that you lit the flame don't let it die, just let it burn

Forever and a day, baby, that's what I want when I'm with you  
You'll never go away, baby, no one can do me like you do  
Forever and a day, that's how long I'll be loving you  
You'll never go away, I will search this whole world for you

How could something, come between us?  
When it's nothing that can mean as much  
And you whisper that you love me  
While were dancing I lose gravity.

I wanna scream your name, out to the sky, let it shine with the stars  
Now that you lit the flame don't let it die, just let it burn  
Nooooo

Forever and a day, baby, that's what I want when I'm with you (when I'm with you)  
You'll never go away, baby, no one can do me like you do (Can do, me like you do)  
Forever and a day, that's how long I'll be loving you  
You'll never go away, I will search this whole world for you

I can search a lifetime and I'd find  
Someone special that I could call mine  
There to have you  
Always want you around me forever,  
Forever and A Day

Forever and A Day

Forever and a day, baby, that's what I want when I'm with you  
You'll never go away, baby, no one can do me like you do (No one can make me feel)  
Forever and a day, that's how long I'll be loving you  
You'll never go away, I will search this whole world for you

I can search a lifetime and I'd find  
Someone special that I could call mine  
There to have you  
Always want you around me forever,

Forever and A Day
