A Christmas Song For You

I met a girl on Christmas day She stole my heart took my breath away We were young and quite naive Young enough we still believed

That love never dies It just grows throughout our lifetime And girl you know it's true Here's a Christmas song for you, baby Hey girl Merry Christmas girl, yeah

At this special time of year I am thankful that you're still here There'll be mistletoes and color lights for the Christmas tree They barely define what you mean to me

Baby love never dies It just grows throughout our lifetime And girl you know it's true Here's a Christmas song for you, baby I love you girl, yeah

In my heart I always knew That I would spend my whole life with you So may your holidays be merry and be raised And may your world be at peace tonight

Baby love never dies It just grows throughout our lifetime And girl you know it's true You're like a light in my life shining through If there was only one thing I could do I'd sing this Christmas song to you Kem
