Every finger was made

For your delight

To follow the cerve of your face

Here next to mine

All of your secrets are safe with me

Can I taste your perfume

I could just linger for days and melt with you

We cant lose with love on our side And could use your affection tonight Love was made just for us Human Touch

Watching the wind blow your hair Don't you wanna spoon

In a garden of pillows we can share
Take off your shoes
Girl you're my favorite time of the year
Can I kiss your toes
Until this fever disappears
Girl you run the show

Oh just stay here with me your love is all that I need I just want it so much Human Touch
