

# California

Kenny Chesney

She lived at the end of a little dirt road  
In a house where secrets go untold  
Barefoot in a cotton dress  
Dark hair in a tangled mess  
And a head full of crazy dreams  
She said

I'm goin' to California  
A place where the sun always shines  
I'm goin' to California  
And I'm leavin' everything behind

You can't help but feel a little bit touched  
When your daddy loves you a little too much  
You can wish on four leaf clovers  
But all the fields have been plowed over  
And there's nothin' left to do but fly away  
She said

I'm goin' to California  
A place where the sun always shines  
I'm goin' to California  
And I'm leavin' everything behind

Stars burn like candles on that two-lane highway  
She made her wish, and disappeared on her 18th birthday  
And she said

I'm goin' to California  
A place where the sun always shines  
I'm goin' to California  
And I'm leavin' everything behind

I'm goin' to California  
And I'm leavin' everything behind

Oh California  
I'm goin' to California  
Oh California  
Leavin' it all behind  
California
