

Lead the Way

Kenny Loggins

Lead the way
You must surely know what I've been looking for
And where we'll find it

Lead the way
Understand my heart is in your guiding hands
And love is here within my life
In my life
Never did my dreams believe
You could be here
We could be on this journey now

Lead the way
There's so much to see
I've only seen enough
I'm right beside you

Lead the way
Now we're here and here is where the road begins
To all we'll meet within our lives
In our lives
Who would ever have believed
But you are here and on this journey now

Lead the way
We're finally here and here is where we've always been
So let the world begin

(Open your wings) Open your wings
(Fly on together) Fly
No matter where you are, no
Follow your heart
