Love Will Follow

Kenny Loggins

I run out of breath and start to shake
I love you with all my heart can take
I hold you beside me in my sleep
And long to be dreaming in my sleep

We've come into a place in time
Where I am yours and you're mine
A circle filled with love

If you'll come away with me
I could show you ecstasy
Close your eyes and we will lead
And love will follow

Take a chance and hold my hand
I know you'll understand
We'll find a special land
And love will follow

A smile on your lips and in your eyes
A stranger adrift in paradise
You touch me and slowly move away
Take all of the night you need to take

Just wait a little while and see
What you mean to me
I've waited all my life

If you come away with me
I could show you ecstasy
Close your eyes and we will lead
And love will follow

Use your wings and fly away
And come with me today
Your heart will lead the way
And love will follow

(If this was just a chance of make-believe)
(You'd never feel it this way)
I've always wanted to love somebody
As much as I, I wanted you now

We've come into a place in time
Where I am yours and you're mine
A circle filled with love

If you'll come away with me
I could show you ecstasy
Close your eyes and we will lead
And love will follow

Take a chance and hold my hand
I know you'll understand
We'll find a special land
And love will follow

Girl, I swear I'll never fall
It's a natural pure law
And everywhere we go
Love will follow

Use your wings to fly away
And come with me today
Your heart will lead the way
And love will follow

(Hold me long, all night long, where you belong, my baby)
(Hold me long, all night long, where you belong, my baby)
(Hold me long, all night long, where you belong, my baby)
(Hold me long, all night long, where you belong, my baby)
(Hold me long, all night long, where you belong, my baby)
(Hold me long, all night long, where you belong, my baby)
(Hold me long, all night long, where you belong, my baby)
(Hold me long, all night long, where you belong, my baby)
(Hold me long, all night long, where you belong, my baby)
