

My World Begins And Ends With You

Kenny Rogers

My world was no more than a dream
And waitin' on a dream can sure get lonely
Your love just fell right into place
And filled and empty space to overflowing, overflowing
My world begins with havin' a friend when I'm feeling blue
My world would end if ever I heard you say we were through
Just don't know what I'd do
'Cause my world begins and ends with you
Sometimes I tell little lies to see if your eyes are looking through me
But you know lying's not my style
I just need your smile coming to me
Reassuring me
My world begins with havin' a friend when I'm feeling blue
My world would end if ever I heard you say we were through
Just don't know what I'd do
'Cause my world begins and ends with you
