

See Me Through

Kenny Rogers

Take my hand, pull me up
Find my own way soon enough
You'll see me through, see me through
What you give will see me through

When my mind cannot reach
You can show me harmony
That sees me through, sees me through
What you teach will see me through

You told me, you showed me
And when you're working day was done
I watched you go, I should have known
That even when I feel alone
You'll see me through, see me through
When I need you, you'll see me through
