

Sing Me Your Love Song

Kenny Rogers

I said sing love don't say good-bye
She said the notes are much too high
I said loves always been a hit
She lost the melody
The words would never fit
Then breath to breath I kissed her lips
She said I must admit my soul remembers this

|: Sing me your love song
Sing me your love song again
Sing me your love song
Sing me your love song again
Tonight her heart to light the fire
I sang love gently to her choir
The rhythm made us swoon and sway
She said I've been this tune
But never played this way
Running her fingers through my rhyme
She smiled inside and said
Now play me one more time :|

Let every life be with love
When there's love you love forever
I hope you understand by the touch of my hand
How I want you night and day
And I'm ready when you say

When breath to breath I kissed her lips
She said I must admit my soul remembers this

|: Sing me your love song
Sing me your love song again
Sing me your love song
Sing me your love song again
Tonight her heart to light the fire
I sang love gently to her choir
The rhythm made us swoon and sway
She said I've been this tune
But never played this way
Running her fingers through my rhyme
She smiled inside and said
Now play me one more time :|
