## **What That Means**

## **Kenny Rogers**

I don't know if I should tell you
That you've been in my dreams
I can't control how you come and go
And I know what that means.

I don't know if I should kiss you That might cause a scene But I can hardly resist your smile And I know what that means.

Right when I didn't expect it You caught me off guard My heart was unprotected Now I'm falling hard.

I don't know if I should hold you You know what that brings I guess it's time that I told you girl And I know what that means.

Right when I didn't expect it You caught me off guard My heart was unprotected Now I'm falling hard.

I don't know if I should hold you You know what that brings I guess it's time that I told you girl And I know what that means...
