

# The Place You're In

Kenny Wayne Shepherd

Cry, baby cry  
I hear what you say  
You used to have a good man baby but you  
Threw it all away

Live baby liv  
While you still can  
I can change your world baby  
If you let me be your man

I want to get you out of the place you're in  
I want to leave you in no doubt  
I want to get you out of the place you're in  
Right now, I want to get you out

Dream for the day  
Open up your mind  
It don't matter what happens girl  
You got to leave it all behind

I want to get you out of the place you're in  
I want to leave you in no doubt  
I want to get you out of the place you're in

'Cause I, I see a bluer sky  
I see a better life  
So baby dry your eyes  
I'm gonna get you out

I want to get you out of the place you're in  
I want to leave you in no doubt  
I want to get you out of the place you're in  
Right now, I want to get you out
