

Where Was I?

Kenny Wayne Shepherd

Staring out the window
Watching the night turn into day
It
I

I
With shadows all around
Where was I before you came around?

Standing in a phone booth
Lord, I watching the rain fall down
Don
Don
I
Like a king without a crown
Where was I before you came around?

I was lonely
I was on my own
I was drifting
No place to call home
Now I
Where would I be without you loving me?

I was lonely
On my own
I was drifting
No place to cal home
Now I
Where would I be without you loving me?

Oh, staring out the window
I heard you say it
With these words from you girl
I can make it through another night
You give me someone to believe in
I was lost
But now I
Where was I before you came around?

You give me someone to believe in
I was lost
Now I
Where was I before you came around?
