

# Hush

Keshia Chanté

Do you really wanna talk, there's nothing left to say, you said  
it all (you said it all)  
And I can't change your mind, that you've already made, you know  
it all (you know it all)  
And if moving on, is where you are, I've already heard it, so don't  
say a word  
Just hush (just hush)

Don't try  
It only makes it complicated  
baby when you try to fake, in your eyes  
they are saying everything, so go ahead and keep it in  
just hush (hush)

I don't see the point to relive everyday  
we had it all (we had it all)  
Cause when you get so high  
And give your heart away, you gonna fall (you gonna fall)  
And if moving on, is where you are, I've already heard it, so don't  
say a word  
just hush (hush)

Don't try  
It only makes it complicated  
baby when you try to fake, in your eyes  
they are saying everything, go ahead and keep it in  
and if moving on, is where you are  
I've already heard it so don't say a word  
Don't try  
It only makes it complicated  
baby when you try to fake, in your eyes  
they are saying everything, so go ahead and keep it in  
just hush
