

Same Thing

Keyshia Cole

Here we go again with all this, like why we can't never get this right

Yo, what you talking bout man

Man its sickening (here we go)

Yo, where you think you going

What you mean where I'm going (going through the same things)

You heard me

Man, whatever

Yo, come here man (here we go)

Over and over again it's the same story man

What you mean over and over again

Come on man, what you talking about (going through the same things)

I should have never let you see me cry

I'll be sitting up thinking, I'll be thinking about

What I'm going do knowing I should just

Leave you alone let go and move on (just leave you alone)

It's same ole things, just another day

And the minute I'm gone, is when you need me (same ole thing)

Couldn't get you to act right (that's when need me)

But now you go getting everything tight

Don't want to play games (no)

Why can't you do right (make you do right)

Why can't you love me (love me)

The way it's suppose to be

Here we go, going through the same thing

Over and over and over again

Here we go, going through the same thing

Over and over and over again
