

Me And My Victory

Khoiba

I won't go away until you say so
I don't till it will be late
I'm wasting your time
We woke up and i certainly got to know
It's something between me and my victory
Me and my victory
Me and my victory
Me and my victory
Scarred and fixed just like a mother
You know that i was and still you frown
I can't explain it to another
It's something between
It's something between
It's something between
Me and my victory
