

Wash This Out

Khoiba

Wash this out
Of my own dream
My own dream

Wash this out
Of my own dream
My own dream

I shut the door, no one is around
Except the gas there is no sound
It is so cool to some degree
Reminds me of you wanted me
I think that was the source of you
Exactly knew what you're gonna do
Come close to me, I hardly breathe
I want your blood go and run in me

Wash this out
Of my own dream
My own dream

Wash this out
Of my own dream
My own dream

Even now when I'm safer than I was
I do I risk again because
I want these things to be done now
And you're the one who showed me how
And all the same is because of you
Exactly knew what you're gonna do
Come here my fate don't watch me so
Come on, come on, come on, come on

Wash this out
Wash this out
