

Black Cloud

Kids in Glass Houses

I know talk is cheap and I pay my way
It's a slow day with nothing to see through
On an empty street in a strange city
I feel my skin, fighting to change me

I let a black cloud follow me around
But you're dancing
You're dancing in my rain
Under a black cloud
Follow me around
But we're dancing
Dancing in my rain

I could stay here forever
Not turn back or look away
And come hell or high water
I wont bend and I wont break
Take it away, take it away
I'll carry on and I wont break

On a losing streak, feel my parents preach
From the darkness, somewhere inside me
Black nativity, put your hands on me
Cause I know that, God's gotta love me
Under a black cloud
Where we share one mouth
You were dancing
Dancing in my rain
Under a black cloud
Follow me around
But we're dancing in my rain

I will stay here forever never looking back again
And I'll be here come the morning when the fever starts to break
Take it away when the ground beneath me shakes
Take it away I'll carry on and I wont break
