

Tell me what you want, I've got something for you
If you wanna little getaway
I can make you fly for a week or two
We could do a little every day
I'll make you feel alright
We're getting so, so high

Tell me how you feel
Did you find what you were searching for
Is it something real
I can give you all you wanted and more
If you need to light up your life

Anything you want, I can get for you
But I need a little in return
I can take you there, take you anywhere
Take a minute, just a little work
And let your soul take flight
It's gonna be alright

Tell me how you feel
Did you find what you were searching for
Is it something real
I can give you all you wanted and more
If you need to light up your life

I wanna feel this way forever
If you need to light up your life
I wanna feel this way forever
If you need to light up your life
If you need to light up your life
I wanna feel this way forever

Tell me how you feel
Did you find what you were searching for
Is it something real
I can give you all you wanted and more
If you need to light up your life

If you need to light up your life
If you need to light up your life
I wanna feel this way forever
If you need to light up your life
I wanna feel this way forever
