

I feel a shiver down my neck  
This fever burning in my head  
I feel your dirt between my teeth  
The earth is moving at my feet  
Let it swallow me

I feel your breath upon my skin  
Just open up and pull me in  
If it's the end, then let's begin  
I'll say a prayer before I sin  
Save me from within

Take me down  
Deeper underground  
I can feel you now  
Forever

A fire burning in the sky  
The blaze unfolds before my eyes  
The masses rolling with the tide  
Is this where I'm supposed to die  
So stay with me tonight

Take me down  
Deeper underground  
I can feel you now  
Forever

Take me down  
Deeper underground  
I can feel you now  
Forever
