Goodnight, Goodbye

You say "I think I am leavable That he got drained All the colors have left" Oh but you know right now You'd do it again Cause I waited my whole life You said "I made him so colorless And that the air just got so cancerous" Deep in the right school play With thee wrong scene I guess it changes everything

So we're on time To say good night But we know that It means good-bye

Say that "It made him so colorless That the air just got so cancerous" I bet you know right now You'd do it again Cause I waited my whole life

So we are on time To say good night But we know that It's like good-bye

You're all that I have now So don't never let me go You're all that I have now So don't never let me go You're all that I have now So don't never let me go You're all that I have now So don't never let me go You're all that I have now **Kill Hannah**
