## **Lightning Causes Madness**

**Kill Hannah** 

they've let us sleep for so long in their beds made of words and even their pillows appear a contradiction and who cares when this lighting starts stand outside

we look to the sound and we've gone down becasue i've never heard it before and the crash of your bombs and leave the blank logic behind the smile that makes me shake makes me shake, makes me shake i know it's not for real the lightning starts i stand outside

stand outside
spare my life

it makes me shake
i know it's not for real
the lightning starts
i stand outside
