

The Songs That Saved My Life

Kill Hannah

Turn up the radio
I need it more than ever now
(more than ever now)

It's the first snow of the year
and something in the atmosphere
is coming here

Froze in our memories again
soon you'll forget but I just can't

I remember, I remember everything
all the times when no one ever came
to get me
all the nights when I was scared
and when it got too weird
it was the songs that saved me

I remember, remember everything
all the tracks that shaped and changed me
inside of speeding cars
and lying on your floor

When we were living in a broken world
We turned it up and then we watched the city burn

I remember, I remember everything
all the times when no one ever came
to get me
all the nights when I was scared
and when it got too weird

And I can't forget
And I can't forget
And I won't forget

Froze in our memories again
soon you'll forget but I just can't

I remember, I remember everything
all the times when no one ever came
to get me
all the nights when I was scared
and when it got too weird
it was the songs that saved my life

I remember, I remember everything
Songs that saved my life

I remember, I remember everything
Songs that saved my life

I remember, I remember everything
It was the songs that saved me.
