

Live Without It

Killing Heidi

You know that we can make things happen that
Is what you say when 'always' comes an'
I feel what you don't feel, it's real an'
That is why we make them understand

We'll show them we can live without it
We'll prove you get through without it.

I know about what goes on in there
But I know better not to sit and stare
Too long at what makes me colour blind
You're like the sun, but you never shine!

We'll show them we can live without it
We'll prove you get through without it
We'll show them we can live without it
We'll prove you get through without it

But sometimes it feels so right it
Feels so right it feels so right
So right, so right, so right, so right, so right
