

# Good Americans

Killradio

American politicians have scarred our good name  
There are those too scared to see the terror threat hyperbole  
We're not all blood thirsty, ignorant, flag waving government sycophants  
See through the lies and corporate ties  
We sing and we want our change

And ignoring the log in our eyes  
Sending thousands off to die  
Watch them lose their ass on page 23  
Then they save their face on your TV

Got to be the good American  
Got to be the good American  
Questioning what they are selling me  
Questioning what they are selling me

Hell bent on nation building  
Governments run amuck  
In the name homeland security  
It's the world wide manifest destiny  
International bully with a disregard for sovereignty  
I see health care shutting down  
But Baghdad needs a mall downtown

How can we, how can we, how can we?  
How can we find the speck in our brother's eye  
When we are the ones going blind?

Got to be the good American  
Got to be the good American  
Questioning what they are selling me  
Questioning what they are selling me  
Got to be the good American  
Got to be the good American  
Questioning what they have done to me  
What they have done to me

How can we save anybody else when we can't save ourselves?  
How can we change anybody else when we failed to change ourselves?  
How can we give away what we don't already have anyway?

Got to be the good American  
I don't want to be no president  
Got to be the good American  
I don't want to be no patriot.

We can't waste  
We can't waste our feelings on  
If they will hate or love us  
We will overcome
