

# Bite the Hand That Feeds

Killswitch Engage

Swallow the sun in shadows as they suck out the marrow  
The hopeless suffer in the fear of tomorrow  
We count the cost to measure it against our loss  
The sacrifice of the innocent

Separation  
The lie from the truth  
(The lie from the truth)  
Our division is our proof

We can't allow this to stand  
Oppression on demand  
Led by liars and thieves  
As desperation bleeds  
They brought us to our knees  
So bite the hand that feeds

All their poisonous belief  
Lead us only to grief  
Led by liars and thieves  
As desperation bleeds  
They brought us to our knees  
So bite the hand that feeds

Altercations spread through violent sanction  
Mother give your children to the beast  
The battles of the poor will soon be called to war  
For the wealthy and their war machine

We can't allow this to stand  
Oppression on demand  
Led by liars and thieves  
As desperation bleeds  
They brought us to our knees  
So bite the hand that feeds

Pushed to the breaking point  
Awake from your slumber  
Kick back the shroud that humanity's under  
The beckoning call of our so called masters  
Subjugate us to the brink of disaster  
All for what cause?  
To perpetuate their endless wars

We can't allow this to stand  
Oppression on demand  
Led by liars and thieves  
As desperation bleeds  
They brought us to our knees  
So bite the hand that feeds

All their poisonous belief  
Lead us only to grief  
Led by liars and thieves  
As desperation bleeds  
They brought us to our knees  
So bite the hand that feeds

Where do we go from here?  
We won't go quietly  
It must be the end of apathy  
We let go of the grip of our sanity

What would you...  
What would you kill for?  
What would you...  
What would you die for?

What would you...  
What would you kill for?  
What would you...  
What would you die for?
