

# All About Me

Kim Wilde

Waking between night and day I'm floating over hills and mountains  
Trying to find a place I've never been Throw my cares away  
The sun kisses my soul and peace has taken hold

It's all about me It's not about you I need to be free I've got  
to be true It's nothing you said It's nothing you do It's all  
in my head I've got to move on Don't have to be sad You know that  
I care I'll never forget the things that we shared I know my  
heart It never felt bad It's not about you

...It's all about me It's all about me
