

# I Can't Say Goodbye

Kim Wilde

I will be there when you call  
I will be there

It's so sad  
when lovers part  
They walk away and break their hearts  
Yes I've had my share of tears  
I walked away but now I'm here  
Cos now that I can see  
All the things that you're doing to me

I can't say goodbye  
In the night I will be there  
I will always stay around  
In the day  
I will be there when you call  
When you call

I will be there when you call  
I will be there  
If you ever need me baby

I want you to understand  
I need you now, I needed you then  
Stupid things got in our way  
But now I'm coming home to stay  
Cos now that I can see  
All the things that you're doing to me

I can't say goodbye  
In the night I will be there  
I will always stay around  
In the day  
I will be there when you call

Never gonna leave you  
Now I'm gonna stay forever  
Cos you know I need you  
Never gonna leave you  
Now I'm gonna stay forever

I can't say goodbye  
And you know I tried to walk away  
But the feeling deep inside of my soul  
Told me to stay  
Cos I can't say goodbye

I can't say goodbye  
In the night I will be there  
I will always stay around  
In the day  
I will be there if you call  
Cos I can't say goodbye
