

Suicide

Kim Wilde

See them all fly, fly so high, higher and high
Watch them burn, the fire is hot, but nobody learns
Who said, "this is what we want to, this is what we
Need to, this is how you have to live"
Just who says, "take what you want to, much more
Than you need to" ... suicide

Having it all Having it all You better get ready to fall
Having it all is suicide

Enchanted lives, before they get out the knives
Should we forget how to feel, and say We're keeping it real,
with the devil we deal A voice inside of you cries "danger"
You know that it's no stranger, better listen while you can,
'Cos time is running out, the future is in doubt
You know it's just suicide

Having it all Having it all You better get ready to fall
Having it all is suicide

Watch them fly ... Take what you want to Watch them burn ...
suicide

Having it all Having it all You better get ready to fall
Having it all is suicide
