

# Time

Kim Wilde

They say that love is a dangerous thing  
And hits your heart like a revolution  
And all the pain it can bring  
Will only lead to confusion  
But now that love has come into my life  
We'll I've discovered a different meaning  
And there's no danger at all  
It's just a beautiful feeling

I know it's wrong to keep it inside for so long  
When we both could see it coming  
It was just a matter of time

Time  
Falling in love with you was just a matter of time  
Falling in love with you

It seems so long ago we were just friends  
Different people with different faces  
just getting on with our lives  
Isn't it funny how fate is  
But I know it's right the way that we're feeling tonight  
Cos we both could feel it coming  
It was just a matter of time

Time  
Falling in love with you was just a matter of time  
Baby, I knew with you it was just a matter of time

Something so good was worth waiting for  
Now it's easy to say that I love you  
When you're feeling it too  
Cos we knew in our hearts  
That is was just a matter of time  
Falling in love with you
