

# Blindly

Kina Grannis

I've been walking down this road too long, too far  
And I'm thinking it's time that I turn back  
I'm losing myself in my own confusing rhythms  
In the path from heart to brain I lack

Wish the things I felt were clearer  
The moonlight over me tonight  
You know all I want is to have you nearer, nearer  
And a love so high that we take flight

So long my ways, I won't miss you  
I'll be all right this time, yeah  
Follow the lines and dreams can come true  
Just feel my way and shut out the light

Don't understand how I can know  
Just how and why I ought to feel  
Cause when it comes to a feeling, that feeling  
My head stops it from being real

I wish that I could see right through you  
To see just what you see in me  
I get so scared, someday I lose, I'll lose you  
When you look inside and I'm empty

So long my ways, I won't miss you  
I'll be all right this time, yeah  
Follow the lines and dreams can come true  
Just feel my way and shut out the light

But I won't forget  
That first time I said those words  
Though in my head I know  
It meant something more than this  
Find my feelings, save them from the part of me  
That confuses everything, when I knew all along  
That my heart was never wrong

So long my ways, I won't miss you, no  
I'll be all right this time  
Follow the lines and dreams can come true  
Just feel my way and shut out the light  
Feel my way and shut out the light, light  
Feel my way and shut out the light
