## **In Your Arms**

**Kina Grannis** 

Hush, now let's go quiet to the park Where it first started Cool night, us lying in the dark I felt my heart Was trying to find the place for you to stay A place where I feel safe

Anything we have known, anything we've forgotten In the rain, in the dark we'll lay In your arms, in your arms I'll stay Anything we have known, anything we've forgotten In the rain, in the dark we'll lay In your arms, in your arms I'll stay

Take my hand Let's go into the trees Behind the branches Falling on our knees I remember feeling like this part of us will never change

Follow me We both know the way It's always been the same

In your arms I'll stay(4x)
