Once inside, everything would change before my eyes No more decay Glorious beauty had taken its place But in horror... I watched as the wolf... began its skin to shed I grabbed a silver crucifix expecting evil to be next To the floor it fell, the crucifix, the wolf was no more a beast Instead a lady only dreams can create Creeping deep into the heart I never had "I'll love you forever... never leave" It was love at first sight, in true love there is no wrong or right I didn't care from where she came, just her name... Then a kiss, soft and warm, my love, am I really not alone? Nights of heavenly sin, in the House of God, I found... true love Nights of heavenly sin, in the House of God, I found... true love "I'll love you forever... never leave" Solo: Andy Plenty of Food and wine, so we laughed and we dined We made love in the holiest of places all the passion it made us crazy Solo: Glen "I'll love you forever... never leave" To the floor it fell, the crucifix, the wolf was no more a beast Instead a lady only dreams can create Creeping deep into the heart I never had I didn't care from where she came, just her name...Angel Then a kiss, soft and warm, my love, am I really not alone? Nights of heavenly sin, in the House of God, I found... true love

Nights of heavenly sin, in the House of God, I found... true love

Angel... Angel... Angel where are you now?
