Venusian 1

Forest desertified  
Ocean wave amplify  
Constant tornado sky  
Black water no supply  
Otherworld, surrogate  
Interstellar our escape  
Sulfur star liberates  
Gotta beat the outbreak

Oh, we're going to the second planet from the sun  
Oh, our ship can deliver us from our ruin

Death admirer  
Ground of fire  
I heard there's a holy yellow sky  
Just make sure you close your eyes  
Venusian 1

Made of junk from the Earth  
Human waste, how absurd  
Journey is childbirth  
Plant a flag, start a church  
Sharp as ice in the night  
Cutting space, satellite  
To a sphere set alight  
We escaped parasites

Oh, we're going to the second planet from the sun  
Oh, our ship can deliver us from our ruin

Floating helium  
Blimp of freedom  
Outside air will bring you death  
Just make sure you hold your breath
