Second Time Around

The bar was dark that night But through the smoke filtered light I saw the tears in your eyes You knew our love was on the line It was the second time That this fool believed your lies

You'll never change You had a good thing girl but You threw it all away

What are you looking for When you're walking out that door I hope it can be found Maybe you'll find love the second time around

Our love was my mistake I knew that it would take So much more than I could give I hope we can be friends 'Cause I know that in the end It's how you and I were meant to live

But I hope you change So when you find a good thing girl You won't throw it all away

What are you looking for When you're walking out that door I hope it can be found Maybe you'll find love the second time around
