

Day In Day Out

King Prawn

Better watch your back
They're watching you with security cams
They watch you coming in and they watch you go again
They're watching you
Everything you do
Cos with their third eye they got a remote view
They spy on you and joe public too
A new world order taking over you
They poison you with their microwaves
They got you doing what they want and now you'll be their slave
SIS? MI6?
They zap you with ELF's
And now you're feeling sick
They're tracking you with their satellite
A secret microchip planted in your mind
Info control=mind control
They got you acting like they want and you don't even know
