

Get It Back

King the Kid

This night has stopped for us
My clock's no longer counting down for the sun to rise
As I close my eyes

The lights up in the sky
Are the only lights for miles until the day resumes
And I stray from view

It doesn't really matter what we say
It doesn't really matter what's in the way
The glass that cannot shatter does not break
This time around I will not look down

Can we get it back, can we get it back
It's where we come from and where we grow old
I'll be dancing all alone for you

I hear it in your breath
And feel it in the beat of your chest
This dance is just beginning
And the sky is the limit for you

The day has rolled around
With every waking thought I know I'm alone again
Alone again

I'll close my ears and hide my eyes and push it underground
but what am I waiting for
Am I waiting for

It doesn't really matter what we say
It doesn't really matter what's in the way
The glass that cannot shatter does not break
This time around I will not look down

Can we get it back, can we get it back
It's where we come from and where we grow old
I'll be dancing all alone for you

I hear it in your breath
And feel it in the beat of your chest
This dance is just beginning
And the sky is the limit for you

Breathe in, Breathe out
It's simple but it tells me all you
Could never say
Breathe out Breath in
And hold it all inside

Can we get it back, can we get it back
It's where we come from and where we grow old
I'll be dancing all alone for you

I hear it in your breath
And feel it in the beat of your chest
This dance is just beginning

And the sky is the limit for you
