A Night Like This

Kira Isabella

I stepped out for some fresh air I guess I wasn't paying attention I bumped into you as you walked in Made you spill whatever you were drinkin' We took a walk outside by the fire Talked all night Then you looked into my eyes

Every girl wants a night like this Full moon, first love, first kiss A Luke Bryan song playin' on the radio Somewhere in the distance We could just let the night end Walk away from the feelin' Or take a chance, tonight, first kiss Every girl wants a night like this

You said you were sorry Cause you bumped into me on purpose Had to find a way to break the ice But something's telling me it was worth it I didn't come here to meet someone But I wouldn't mind if you walked me home tonight

Every girl wants a night like this Full moon, first love, first kiss A Lady A song playin' on the radio Somewhere in the distance We could just let the night end Walk away from the feelin' Or take a chance, tonight, first kiss Every girl wants a night like this

Oh oh oh

Take my hand Pull me close boy One more kiss like that Make it hard to say goodnight

A Luke Bryan song playin' on the radio Somewhere in the distance I just can't let the night end Turn away from the feelin' Take a chance, tonight, oh oh oh Take a chance, tonight, first kiss Every girl wants a night like this A night like this Every girl wants a night like this
