

Coke Can

Kira Isabella

Standing at the pump
Going through my phone
So cold it looks like I'm blowing smoke
The handle clicks and I close the cap
Go inside to pay for the gas

And then I see a coke can
In some guys hand
And I think of that county fair
The first thing you ever bought me
We were fifteen
Yeah I fell for you right there
Those nights those eyes your laugh
All that from a coke can

I don't say a word
And take my receipt
Gotta snap back into reality
I walk every aisle a couple times
Trying to get you off of my mind

And then I see a flashlight
By the bud light
And i think of that labour day
We were staying at your folks house
When the storm hit
And snuck down the dark hallway
That night that kiss your touch
First time
All that form a flash light

Now I'm driving home feeling all alone
Tears are welling up in my eyes
Are you happy now
Who do you think about
I had it all when you were mine
And I'm missing you tonight

All because of some coke can
In some guys hand
Took me back to those college nights
We were running on caffeine and big dreams
I would've given you my life
These memories are all i have
Those nights your eyes your smile your laugh
The things we see that take us back
All that from a coke can
