## **My Affair**

## **Kirsty MacColl**

When I was just a child My folks would drive me wild They'd spy upon my every move Until it drove me to despair They told me what to wear They told me not to cut my hair But that's all over now I had to tell them anyhow

It's my affair Where I go and what I do It's my affair oh yeah It's my affair It's up to me and not to you It's my affair

That's the way I want to keep it I kissed the boy in secret Thrilled me to the very core I couldn't stop I wanted more and I didn't hear the door and They caught me on the floor With my affair

And when we first got wed We used to stay in bed All day and night all night and day We bedded half our lives away But that's all over now We move in higher circles Chomping through the upper crust I couldn't see you for the dust And then you met that girl Who left you with your money spent And now it's no concern of yours If I sleep with the President

It's my affair And if I don't come home tonight It's my affair alright It's my affair Who I see is up to me It's my affair

That's how I want to keep it I kiss the boys in secret Hiding in the parking lot Is just as far as I have got but If the phone should ring and There's no one there Then it's my affair

Eso es asunto de ella Donde va why lo que hare

Well it's all over now You've seen the last of me And I don't have to put up with you Giving me the third degree So you go on your way And don't come sneaking round the back door Trying to get yourself
